

Strategic Talent Acquisition for a Rapidly Evolving Market

In the current industrial landscape, the primary obstacle to project completion is rarely the technology—it is the availability of skilled talent. At Linderlake Corporation, our advantage is not simply that we place this caliber of professional with our clients. We deploy the same enterprise-grade workforce in our own field operations. We don't just source the talent—we are the talent. With over three decades of operational experience since our founding in 1988, that firsthand expertise is what allows us to deliver a truly proactive workforce strategy, one built on proven performance rather than assumption.

Why Our Staffing Model Matters:

- **Why Our Staffing Model Matters:** Linderlake Staffing now operates as part of AtWork, combining our specialized industry knowledge in Telecom/FTTH, Power, and GIS with a nationally awarded infrastructure serving 30 states.
- **Compliance & Scalability:** We provide dependable, compliant, and scalable staffing solutions designed to move your business forward, from technical roles to executive search.
- **Award-Winning Excellence:** Recognized by SIA (Staffing Industry Analysts) as industry leaders in client and talent satisfaction.

Our Approach: We don't just find candidates; we build partnerships. Whether you need administrative support, specialized field technicians or designers, our team ensures your projects are "talent-ready" before the first deadline hits.

Staffing Solutions Built for Infrastructure and ROW Projects

Unlike traditional staffing providers, Linderlake understands the specialized workforce required to support infrastructure development.

Our staffing solutions are designed specifically for industries such as:

- Telecommunications Infrastructure
- Utility and Energy Projects
- Fiber Network Deployment
- Transportation Infrastructure
- Right-of-Way Acquisition Projects

Our partnership with **AtWork** — one of the fastest growing staffing organizations in the United States — allows us to deliver staffing capabilities that combine **national scale with industry expertise**.

Some examples of the positions are: Installation Technician, Construction Project Manager, Technical Project Coordinator, Construction Supervisor, Permit Specialist, Construction Coordinator, Fiber/Cable Splicer, Maintenance Technician, Fiber Optic Technician, Splicing Technician.

Did you know?

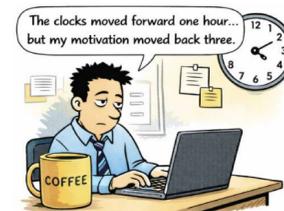

Did you know that talent shortages are currently the leading cause of budget overruns in urban infrastructure projects? Utilizing a dedicated staffing partner can reduce hiring windows by up to 30%, allowing your ROI to begin months ahead of schedule.
